

Sample job plan for Breast Clinician Trainees working LTFT

December 2021

The following sample job plans suggest how the trainee might split their working week IF WORKING LTFT, assumed 0.6WTE

YEAR 1

Month 1 – 6:

Observation, then gradual DIRECT SUPERVISION

Symptomatic clinical skills

Family History Clinic

Visits to genetics clinics

MDT observation

Physics

1 PA to attend local physics teaching

1 PA in addition for private study

Month 7 – 12

As above, with some indirect supervision FHx and Sympto clinics

Introduction to ULTRASOUND and MAMMOGRAM

Observation and some direct supervision

YEAR 2

Reduced number of FHx – independent

Reduced Sympto Clinics – indirect supervision

Greater emphasis on IMAGING

Introduction to SCREENING

MDT prep and presentation – direct supervision

YEAR 3

Same emphasis as Yr 2 but with indirect supervision in imaging clinics

Flexible PA depending on US vs MMG numbers achieved

YEAR 4

Similar with increasing independence

Introduction to Oncology clinic observation

COLOUR CODE for Sample Job Plan (see below)

PHYSICS

SYMPTOMATIC/ CLINICAL SKILLS
